<b>Target version:</b>			
<b>Description</b>			
<p>When my session expire while i was on the filemanager web application i got a 404 error and the url in the navigation bar is the real url ( ie : machinename.domain:8080/filemanager.. ), not the redirected one.HTTP Status 404 -</p> <p>I need to re-authenticate myself in order to have the filemanager usable again.</p> <p>It could be nice that the filemanager redirect automatically the user to the login page if his session is expired.</p>
