WIDE - Bug #854
No rule to prevent weird files and folders names

10/25/2013 10:47 AM - Philippe Estival

Target version:				

Description

There is no regex in the filesystem controler to prevent the input of weird names
(as in a rename for instance)

for folders, should be : "[_a-zA-Z0-9\\-\\.]+"

Also make sure that files uploaded from macOS (more permissive don't fall in that case :
(ie : locale éàèù(), etc...)

History

#1 - 10/29/2013 10:13 AM - Philippe Estival

- Priority changed from Normal to High

#2 - 11/04/2013 07:32 PM - Philippe Estival

- % Done changed from 0 to 80

#3 - 11/12/2013 10:38 AM - Philippe Estival

check accent éàè and mac permission names
